## Summary

---

Solution-driven Software Developer with **2.1+ years** of experience building scalable web and mobile applications using Angular, React.js, Next.js, .NET Core Web API/MVC, MAUI, and Blazor. Strong in API design, N-Tier architecture, database optimization SQL Server/PostgreSQL, and clean, maintainable code. Experienced with Firebase, Azure DevOps, CI/CD, SCSS theming, and Agile workflows. Known for quick adaptability, ownership of end-to-end solutions, and delivering high-performance, user-focused applications..

## Skills

---

- **Frameworks & Libraries:** .NET Core, ASP.NET MVC, .NET Web API, MAUI/Blazor, Angular, Next.js
- **Databases & Data Access:** SQL Server, PostgreSQL, LINQ, SP, ADO.NET, EF Core, Dapper, SSMS
- **Languages:** C#, JavaScript, TypeScript
- **Cloud & DevOps:** Azure DevOps CI/CD, Azure Services
- **Methodologies & Version Control:** Agile, Scrum, MVC, OOP, Git, GitHub, GitLab, Source Tree
- **Tools:** Visual Studio, VS Code, Postman, Git, SSMS, PgAdmin

## Experience

---

### Tatvasoft

Jan 2024 – Present

Associate Software Engineer

- Delivered robust full-stack solutions for education system, healthcare platform and employee management systems also ensuring secure data handling and reliable user experiences.
- Closely collaborated with cross-functional teams including QA, UI/UX, and DevOps following Agile methodologies to implement streamlined CI/CD pipelines via Azure DevOps, supporting rapid and consistent feature delivery.
- Led a team of 3 junior developers in migrating and enhancing existing applications, improving architecture, performance, and mobile responsiveness.

## Projects

---

### SmartEdu [Education]

Technologies: .NET Core Web API, Angular, SSMS

- Developed core modules such as Events and Attendance for a School Management System.
- Integrated Stripe payment gateway, SignalR and worked on RDLC report generation for system documents.
- Contributed to a .NET MAUI mobile application with multilingual support and Firebase push notifications.
- Collaborated closely with QA, UI/UX, and DevOps teams in Agile sprints, ensuring continuous delivery through CI/CD pipelines using Azure DevOps.

### Payroll-ERP [Human Resource Management]

Technologies: - .NET Core Web API, Angular, SSMS

- Worked on migration and enhancement of Payroll EMS from .NET MVC, focusing on company/sub-company configuration, HR management, employee records, pay cycles, leave processing, general ledger, claims, and loan management.
- Led payroll development with junior developers, providing technical guidance, performing code reviews, and managing merge requests to ensure quality and consistency.

### HalloDoc Platform [Healthcare]

Technologies: - .Net MVC, PostgreSQL

- Designed and implemented a full-fledged healthcare platform Hallodoc with .NET MVC N-tier architecture.
- Enabled multi-user role access, real-time chat for messaging, Google Maps integration for provider location, and patient shift scheduling via FullCalendar. also generated excel using closeXML and pdf using Rotativa.

## Education

---

### Gandhinagar Institute of Technology - GTU

Jul 2021 - Jul 2024

B.E. in Information Technology

CGPA 9.0
