## ABOUT ME

Solution-driven Software Developer with 2.1+ years of experience building scalable web and mobile applications using Angular, React.js, Next.js, .NET Core Web API/MVC, MAUI, and Blazor. Strong in API design, N-Tier architecture, database optimization SQL Server/PostgreSQL, and clean, maintainable code. Experienced with Firebase, Azure DevOps, CI/CD, SCSS theming, and Agile workflows. Known for quick adaptability, ownership of end-to-end solutions, and delivering high-performance, user-focused applications.

---

## EDUCATION

**B.E. IT**
**Gandhinagar Institute of technology**
From GTU with 9.00 CGPA
2020 - 2024

**HSC**
From GSHEB with 80.00%
2019 - 2020

**SSC**
From GSHEB with 84.33%
2017 - 2018

## SKILL

- **Frameworks & Libraries**

  .NET Core, ASP.NET MVC, .NET Web API, MAUI, Blazor, Angular, ReactJs, NextJs

- **Databases & Data Access**

  SQL Server, MySQL, PostgreSQL, LINQ, SP, ADO.NET, EF Core, Dapper, SSMS

- **Languages**

  C#, JavaScript, TypeScript

- **Cloud & DevOps**

  Azure DevOps CI/CD, Azure Services

- **Methodologies & Version Control**

  Agile, Scrum, MVC, OOP, Git GitHub, GitLab, Source Tree

- **Tools**

  Visual Studio, VS Code, Postman, Git, SSMS

## WORK EXPERIENCE

### Associate Software Engineer (ASE) - Tatvasoft                2025

SMS, EMS - Angular, Web API, SSMS

Developed core modules Events, Attendance in a School Management System using Angular and ASP.NET Web API. Integrated Stripe payment gateway and SignalR. Also RDLC report generate. Contributed to MAUI mobile application with multilingual support and Firebase notifications. Collaborated closely with QA, UI/UX, and DevOps teams in Agile sprints, ensuring continuous delivery through CI/CD pipelines using Azure DevOps.
Began leading a 3 person team to migrate a MVC app to Angular with focus on better architecture and mobile responsiveness.

### Trainee Software Engineer (TSE) - Tatvasoft            2024–2025

HealthCare - .Net MVC, PostgreSql

Designed and implemented a full-fledged healthcare platform Hallodoc with C# ASP.NET MVC N-tier architecture.
Enabled multi-user role access, real-time chat, Google Maps integration for provider location, and patient shift scheduling via FullCalendar. also generated EXCEL using closeXML and pdf using Rotativa.

### Intership - Infolabz It Service                         2024

Created dynamic, API-driven web applications using React.js.
Built projects like COVID-19 Tracker, Mutual Fund Scheme Info, and News Info platforms.
Focused on UI/UX, API consumption, and responsive design principles.

### Academic Projects                                   2023–2024

E-Ride Sharing - www.rideshare-4c026.web.app
where drivers and rider connect using this platform. implemented Firebase Authentication, Realtime database, hosting.
Android Applications using Java - MPlayer, Keep Notes and ABCoding application
